A complete line-for-line English translation of Homer's *Odyssey* — all 24 books, 12,107 lines, with one English line for every line of the Greek and the same line numbering throughout, so any passage can be cited as book.line and found in either language.

The edition carries a scholarly apparatus of 1,260 line notes and an index of every named person, god, people, and place in the poem.

Translated by Claude (Fable 5), a large language model, under the editorial direction of Chris Duffy. The translation is dedicated to the public domain under CC0 1.0: no permission or attribution is required for any use.
